

A

Signatures detection accuracy (recall)

Recall of identified signatures

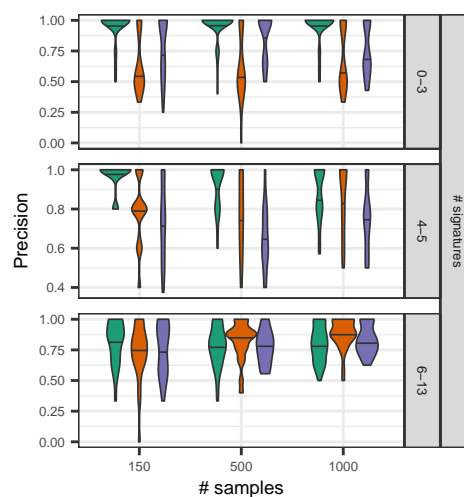

Method

B

Signatures detection accuracy (precision)

Precision of identified signatures

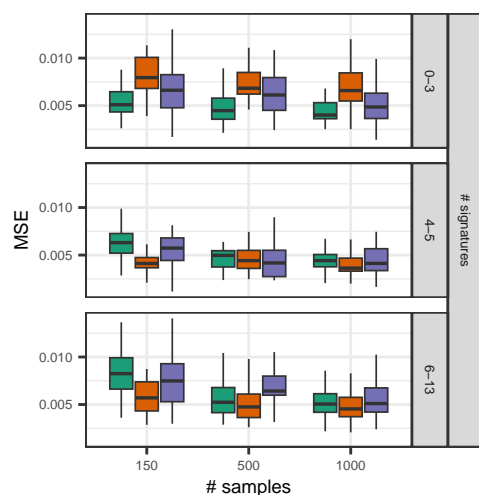

Method

C

Reconstruction error

MSE between inferred and true mutation counts

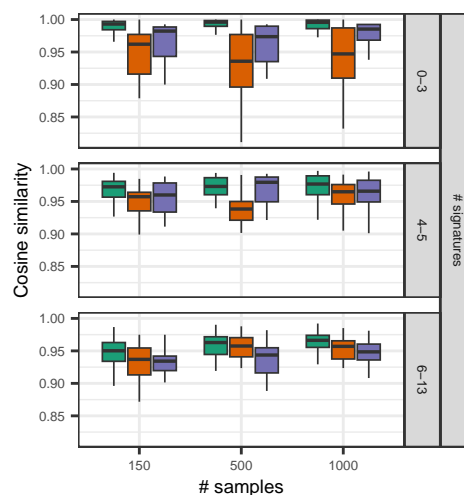

Method

D

Signatures quality

CS between inferred and true signature profiles

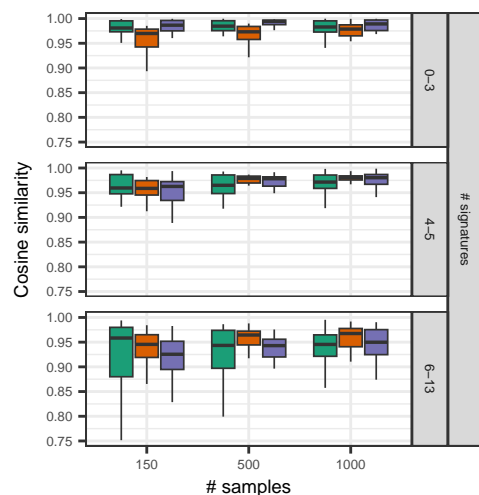

Method

E

Exposures quality

CS between inferred and true exposures of matched signatures

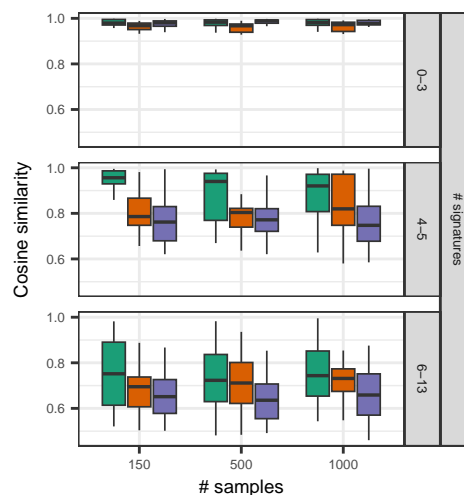

Method

F

Exposures quality (all signatures)

CS between inferred and true exposures of all signatures

Method
